

COMMUNITY PHARMACY REFERENCE LIBRARY LIST

All community pharmacies are required to have the most current versions of the BC Pharmacy Practice Manual. The CPBC *ReadLinks* is an exception, as only the most recent three years must be retained.

An updated copy of the *Revision Dates of Legislation* is provided when documents are amended, and it is available on the CPBC web site. Please ensure that all documents are current and readily accessible within the dispensary.

To obtain copies of these documents, please contact the College office for an order form or access our web site at www.bcpharmacists.org.

Electronic Database References

Electronic database references are acceptable for any of the authorized choices within any of the required categories, provided that they are as comprehensive as the printed version and meet the same updating requirements.

Residential Care Homes and Facilities References

Pharmacies providing service to licensed residential care facilities and homes must obtain a minimum of one reference applicable to geriatric residents or to psychiatric care residents, as appropriate to the pharmacy's service area.

Suppliers / Sources

Pharmacy reference texts can be obtained from several sources. The College is aware of the following suppliers of the required references:

BC Drug & Poison Information Centre (DPIC)

Tel: 604.682.2344 Ext. 62126
